AIR PURIFIER

New generation of fresh air technology: Mia Air

We spend 90% of our lives indoors and yet indoor air quality is 10 times more polluted than outdoors. This can lead to health problems and lowers our quality of life. Specifically designed to clean air pollutants, **Mia Air** offers superior indoor air quality that will improve the quality of life.

Continuity in fresh air

MIA Air continuously measures the air quality without affecting the ambient temperature. This improves the quality of life by continuously cleaning the indoor air at a frequency varying according to the size of the room and the amount of pollutants.

It is one of the highest capacity devices with the ability to clean a room of 75 m² (750 sqft) on average 3* times per hour.

**The average ceiling height is considered as 3 meters (9.843 ft).*

■ TECHNICAL SPECIFICATIONS

Power Supply	230 VAC, 50 / 60 Hz
Energy Consumption	25-105 W
Measurements (NET) Weight	72 x 38 x 38 cm 16 / 18 kg 28 x 15 x 15 inches 35 / 40 lbs
Air Volume	90 to 610 m³/h with 6 speed levels 53 to 360 cfm with 6 speed levels
Sound Level	<70 dB (A)
Air Sensors	VOC, PM1 / PM2.5 / PM10, CO ₂ , Temperature, Humidity
Remote Control	Can be remote controlled via Mia Air Mobile App
Active Carbon & HEPA Filter Specifications	Front Filter, Active Carbon Filter, HEPA H13 (standard) ≥ 99,99% @ ≥ 0,3 µm HEPA H14 (optional) ≥ 99,999% @ ≥ 0,3 µm
Color Options	<div><div></div><div></div><div></div></div>
VOC Efficiency	Benzene Formaldehyde Ethyl Alcohol Toluene Xylene etc.

Sometimes what you can't see, can do the biggest harm to you

With more than 30 years of air filtration experience, **Mia Air** offers you the latest filtration technology. **Mia Air** has been designed to provide fresh clean air by trapping 99.99 % of ultra-fine particles in the air. By using HEPA filtration, which traps extremely small particles, **Mia Air** can transform polluted air into clean air in seconds.

PARTICLES CAN AFFECT YOUR ORGANS

By capturing chemical pollutants (VOCs) in the air with the world's leading activated carbon filter, **Mia Air** traps chemical pollutants and greatly reduces the risk of developing health problems caused by air pollution. The 'best in class' **Mia Air** HEPA and activated carbon filters not only supply highly efficient filtration but also long-lasting service life.

Designed with environmental sensitivity in mind

With a minimum carbon footprint, **Mia Air** is energy efficient and environmentally friendly. Thanks to its anti-allergenic structure, it delivers fresh air at a maximum level.

Mia Air is CE certified, is designed for safety of all age groups and has a fireproof ABS body structure.

"Your Air" is under control with Mia Air mobile app

Mia Air's practical panel design, allows you to control the environment of both you and your loved ones in a simple way both manually and with the mobile app.

Mia Air Mobile App is an all-in-one screen design, providing instant information on ambient air quality and filter life, and provides access to all parameters related to the device. When it is time change the filter, the mobile application allows online ordering with an automated reminder.

Improve the air quality

- Effective Against Allergens
- Environmentally Friendly
- User Friendly
- CE Certified
- Auto, Silent and Turbo Mode
- Mia Air Quality Detection System (PM1, PM 2.5, CO2, VOC, Humidity and Temperature Sensors)
- Traps $\geq 99.99\%$ of Pollutants in the Air (HEPA Filtration Technology)
- Ozone Free
- Mobile App

EFFECTIVE AGAINST

AIR DUST

POLLEN

ALLERGENS

PET DANDER

CHEMICAL VAPORS
(Volatile Organic Compounds)

ODOR OF
SMOKERS

MICROORGANISMS

Deactivation ratio of micro-organisms within the 1st hour of contact 99.98%* with ANTIMIC® coated HEPA filters.

**AATCC Test Method 100-2004, % reduction of Legionella Pneumophila, Sabanci University, 2012*
